

## NanoConcept<sup>®</sup> Anti-Fog Glass

Anti-fogging protection for glass surfaces

### Where to use NanoConcept Anti-Fog Glass?

NanoConcept<sup>®</sup> Anti-Fog Glass is applicable for example on glass and mirror surfaces in any household, bathrooms, wellness and sauna areas, glass and mirror surfaces as well as on windscreens, rear windows and side windows in the motor vehicle area.

### Product description

With NanoConcept<sup>®</sup> Anti-Fog Glass we have developed a highly efficient anti-fogging and cleaning agent based on a nano chemical wetting agent. Due to the molecular nano network, the single molecules connect direct chemically with the treated surface. Due to this transparent, highly efficient temporary anti-fogging protective film, we reach a highly intensive and crystal clear anti-fogging sealing, what prevents a fogging effectively.

### Attributes

- A highly effective anti-fogging and cleaning agent
- Prevents the fogging of glass surfaces for weeks even during bigger temperature variations
- Prevents effectively and in long term the fogging of mirrors and glass surfaces in wet room areas
- Removes stubborn contaminations residue-free and originates a clean surface free of streaks
- Not flammable, free of solvent and absolutely free of methyl alcohol, acetone, carbon tetrachlorides, ammonia and benzene, free of wax and silicone as well as PH neutrally, further eco and ozone friendly, biodegradable and not skin-irritating

**Form of delivery:** Liquid

**Tone:** Light blue

**Scent:** Fresh

**Productivity:** About 5 - 10 ml per m<sup>2</sup>. The practical consumption depends on the surface roughness and the application procedure.

**Relative density:** 0,99

**Thinning:** None

**PH-value:** Neutral

### Application

Spray on the surface steadily. Allocate with a paper cloth (kitchen roll / kitchen crepe) and let it act for about 20 - 30 seconds. Afterwards dry the still moistly surface with a folded and dry paper cloth until the surface is clear and dry. Only use cloths made of cellulose or paper!

**Do not use a cotton or microfiber cloth!**
